Summary

In 2014, I started a part-time degree in informatics to be completed in 2019. 2016 I started to self study Javascript along with many of the facets of modern web applications as a hobby. After a fulfilling career as an asset accountant for more than 9 years, I pursued a great career changing opportunity in 2017. Currently involved with in the development of web based applications that run on big name cloud service technologies.

Experience

Asset accounting specialist / Project manager at i-Chain (Pty) Ltd

August 2012 - April 2017

There is no known competitor in South Africa who can deliver fixed asset management software and related services, project implementation, and a support programme that meets every requirement in terms of GAAP, MFMA, PFMA, GRAP, IFRS and even SARBOX compliance, as we do.

i-Chain achieved milestones in successfully moving several public departments

to an Unqualified Audit Opinion. Where other large consulting firms had previously tried to do the same and failed, only i-Chain had the capability to deliver as a result of our unique approach, team of experts, focus and leading-edge technology.

When it comes to the creation, correction and management of asset registers our track record, and out-performance of seemingly formidable competitors, speaks for itself.

Education

University of South Africa/Universiteit van Suid-Afrika Higher Certificate, Economic and management sciences, 2014 - 2014

This certificate is an introduction to economics and how it functions in South Africa. It also introduces a student to the principles of business management and how a sustainable business can be started. Furthermore; it teaches a student how to write formally in a business and academic environment as well as to give an introduction into career and study management, the business environment and how to manage employees effectively.

This certificate also contained modules for elementary mathematics and basic accounting.

Udemy Academy

Certificate, Deep understanding of Javascript under the hood, -

This course covered such advanced concepts as objects and object literals, function expressions, prototypical inheritance, functional programming, scope chains, function constructors (plus new ES6 features), immediately invoked function expressions (IIFEs), call, apply, bind, and more.

it was a deep dive into the source code of popular frameworks such as jQuery and Underscore to see how you can use your

understanding of Javascript to learn (and borrow) from other's good code.

Learned the foundations of how to a Javascript framework or library.

Applying what I have learned will make me a better Javascript developer, and improve my abilities in AngularJS, NodeJS, jQuery, React, Ember, MongoDB, and all other Javascript-based technologies!

Hoërskool Overkruin

1998 - 2002

Subjects Passed:

Afrikaans 1st Language - Higher Grade

English 2nd Language - Higher Grade

Mathematics - Standard Grade

Science - Standard Grade

Technical Drawing - Higher Grade

Mechanical Workshop - Standard Grade

Udemy Academy

Certificaiton, Tomcat server from beginner to advanced, -

This course starts with the basic concepts of Tomcat Server as beginners and moves to advance topics of server configuration. Covers most of the major concepts that one should know while using Tomcat. As Tomcat is the core servlet container being used in many open source app servers like JBoss, this will give a solid foundation for further progress in middleware. If you are a middleware administrator(tomcat server administrator) then it is more suitable for you as it covers deployment, ssl configuration and various cluster related configuration steps that you generally use while administering the servers. Configuring a server is a daunting task and you need more clarity about various parameters, this tomcat server course is drafted keeping all the initial complexity in mind by making simple videos to address complex topics of Apache tomcat.

Cti

Computer Science, 2004 - 2005

University of South Africa/Universiteit van Suid-Afrika

Bachelor of Commerce (B.Com.), Business Informatics, 2015 - 2019

There are many similarities to the discipline of Information Systems (IS). What makes Business Informatics (BI) unique is that it includes elements of computer science to a larger extent than IS and where IS is more "explanation oriented" BI is more "solution oriented".

BI includes significant construction and implementation oriented elements. One major focus lies in the development of solutions for business problems regarding finance and operations integrated with information systems to generate accurate business intelligence.

Free Code Camp

Full Stack Development Certification, Computer Software Engineering, 2016 - 2019

300 Hours of responsive web design mainly concerning HTML and CSS.

freeCodeCamp:
