Clifford Crerar

< iCode | iBuild | iSolve /> Solutions Architect
Johannesburg Area, South Africa

Summary

In 2014, I started a part-time degree in informatics to be completed
in 2019. 2016 I started to self study Javascript along with many of
the facets of modern web applications as a hobby. After a fulfilling
career as an asset accountant for more than 9 years,I pursued a
great career changing opportunity in 2017. Currently involved with
in the development of web based applications that run on big name
cloud service technologies.

_____

Experience

Rosebank

i-Chain (Pty) Ltd
Asset accounting specialist / Project manager
August 2012 - April 2017 (4 years 9 months)
Edenburg, Sandton

There is no known competitor in South Africa who can deliver fixed asset
management software and related services, project implementation, and a
support programme that meets every requirement in terms of GAAP, MFMA,
PFMA, GRAP, IFRS and even SARBOX compliance, as we do.

i-Chain achieved milestones in successfully moving several public
departments
to an Unqualified Audit Opinion. Where other large consulting firms had
previously tried to do the same and failed, only i-Chain had the capability to
deliver as a result of our unique approach,

team of experts, focus and leading-edge technology.

When it comes to the creation, correction and management of asset registers our track record, and out-performance of seemingly formidable competitors, speaks for itself.
